Serial No.: 10/582,005

Response dated 24 October 2010

Reply to Office Action of 12 May 2010

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A three-way stopcock for medical use comprising:

a primary arm and two secondary arms meeting at and integral with a body, wherein the primary

and secondary arms are configured and arranged to receive an intravenous catheter and two supply

catheters, respectively; and

a plug disposed within the body, wherein the plug is configured and arranged for being externally

activated by a handle;

wherein the principle arm and the secondary arms can be brought to selectively communicate with

each other or be disconnected, and wherein the two secondary arms protrude diametrically opposite

from the body, wherein the tangent of both arms nearest the body is perpendicular to the principal

arm, wherein each secondary arm has (i) a proximal segment adjacent to the body that is curved and

flexible, and (ii) a distal segment integral with the respective proximal segment and having an end with

means for coupling to a corresponding catheter, wherein the two distal segments can be configured

essentially parallel to each other and the primary arm, wherein the two proximal segments can be

oriented in a direction perpendicular to the principal arm.

2. (Previously Presented) The three-way stopcock according to claim 1, wherein the secondary

arms are made of medical grade polymer.

3. (Previously Presented) The three-way stopcock according to claim 1, wherein the plug presents

in its interior inner channels an interior configuration in the form of inverted "V", wherein the

branches are slightly arched.
